

# TUTORIAL

## Instagram Stories Icons Pack

Inside the AE Project you will find the “Instagram” and “DO NOT TOUCH THIS FOLDER” folder.

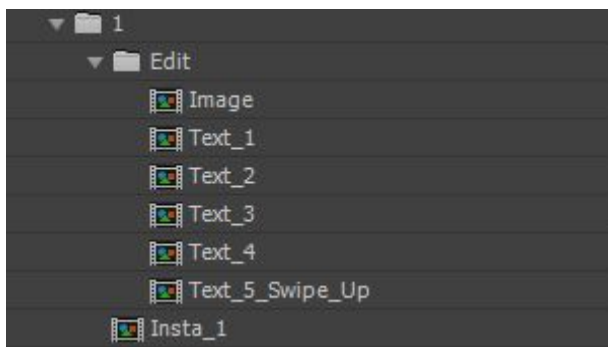

Do not touch folder named **DO NOT TOUCH THIS FOLDER** :)

Inside Instagram you will find 117 folders.

In each folder there is composition named **Insta\_(number)** and Edit folder

Drag your image into Image composition, adjust it size

In **Text** compositions (Text 1-5) change your text

**Text\_1** - Sale

**Text\_2** - -50% UNTIL MONDAY

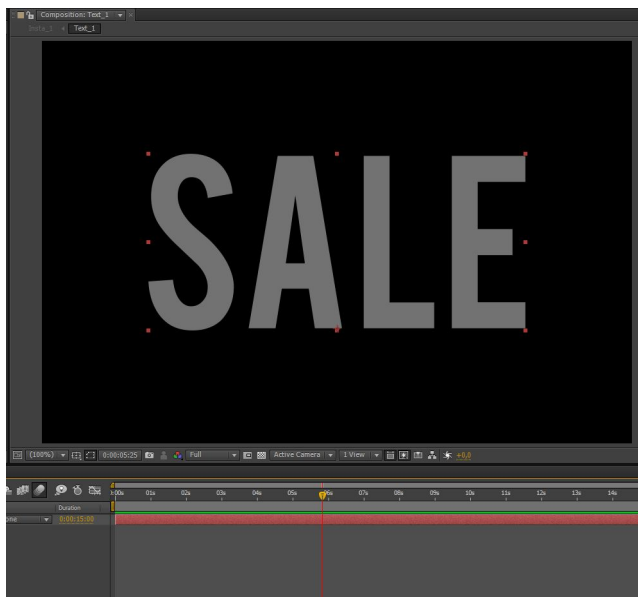

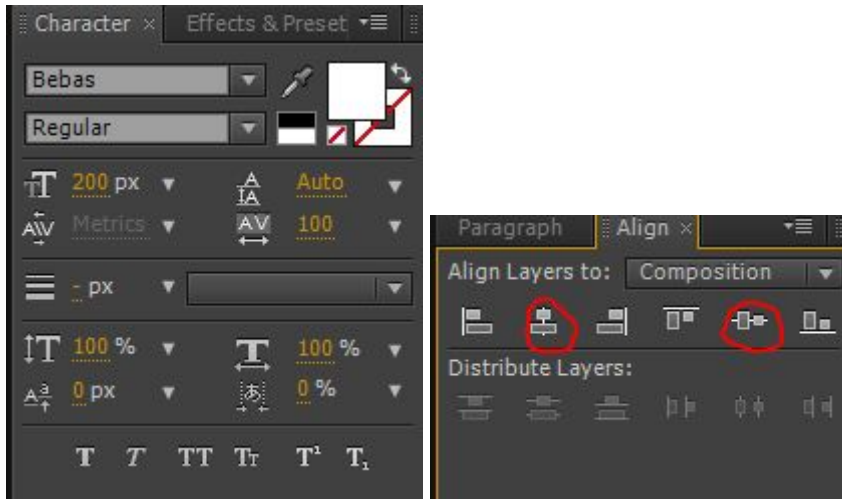

**Text\_3** - JACKETTOWN

**Text\_4** - [www.jackettown.com](http://www.jackettown.com)

**Text\_5\_Swipe\_Up** - SWIPE UP

Change it to whatever you want. You can change to different font if you want, different font size. (Window - **Character**). After changes you can align text into center by pressing marked keys in Align tab (Window - **Align**)

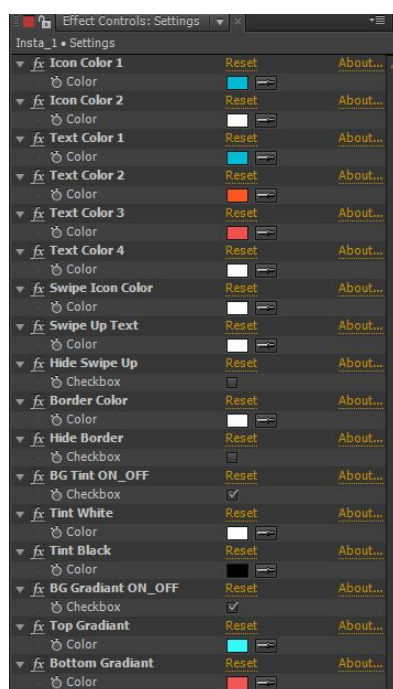

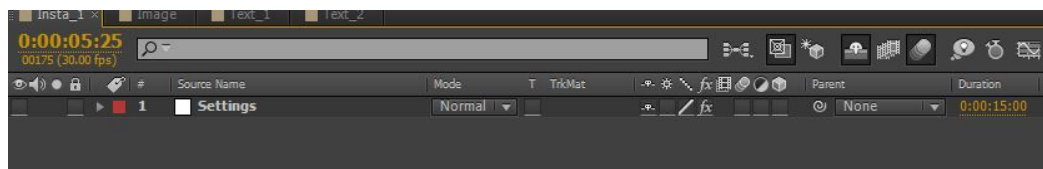

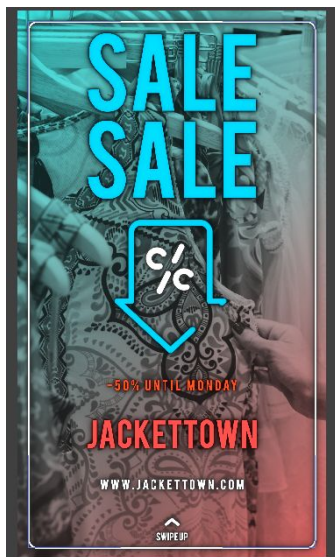

If you need more text lines, select text layer and press **ctrl+D** or **Command+D**, or just press Enter to jump into next line

If you duplicated text press **V** and drag new text layer to wanted place.

**Note** - text must fit inside composition

In **Insta\_(number)** you will see how you final composition looks like

Inside **Insta\_(number)** composition, in settings layer you can change colors of icon, text, border line, turn off border line, turn of swipe up arrow and text, turn On\_Off Background tint(similar to black and white photo), you can change tint colors. Turn On\_Off Background Gradient Ramp and change it color.

**Note** - if you want your original photo with no filters, turn Off BG Tint and BG Gradient
