**CSMA / CD**

In the Ethernet world we have some rules of communication called Carrier Sense Multiple Access/Collision Detection (CSMA/CD), what is one of the goals of CSMA / CD?

*Selecione uma alternativa*

- A** One of the goals of CSMA / CD is to allow all ports to communicate using Full-duplex communication
- B** One of the goals of CSMA / CD is to avoid collisions between data send by devices
- C** One of the goals of CSMA / CD is to allow all ports to communicate using Half-duplex communication
- D** One of the goals of CSMA / CD is to allow multiple devices transmitting at the same time
