

OSI model

Some users are complaining that they can't access the internet, in order to see what's happening, you open your browser and you type: <https://www.alura.com.br> (<https://www.alura.com.br>). What is the highest layer on the OSI model you're using to perform this task?

Selecione uma alternativa

A	Network
B	Presentation
C	Session
D	Application
E	Physical
F	Data-link
G	Transport
