Authentication

In your network you're currently using WEP as the security algorithm and you need to give a reason to your director to move to WPA. What would you tell your director?

Selecione uma alternativa

A   WEP uses AES as a stream cipher which is known for having common vulnerabilities. WPA on the other hand uses TKIP which is stronger than AES

B   WEP uses 3DES as a stream cipher which is known for having common vulnerabilities. WPA on the other hand uses TKIP which is stronger than 3DES

C   WEP uses RC4 as a stream cypher which is known for having vulnerabilities. WPA on the other hand uses TKIP which is stronger than RC4

D   WEP uses TKIP as a stream cipher which is known for having common vulnerabilities. WPA on the other hand uses RC4 which is stronger than TKIP
