## Switches and collision domains

Considering the topology below where we have a Hub and a Switch, how many collision domains do we have?

*Selecione uma alternativa*

**A**  We have a total of 5 collision domains (4 PC and the link connecting the Hub and the Switch)

**B**  We have a of 4 collision domains (2 PC connecting to the Switch and 2 PC connecting to the Hub)

**C**  We have a total of 3 collision domains (2 PC connecting to the Switch and the Hub)

**D**  We have a total of 2 collision domains (2 PC connecting to the Switch)
