

SH Audio Preset Pack

Thank you for purchasing the SH Audio Preset Pack. I know you'll find tremendous value from these downloads, taking your audio quality to the next level as well as saving you loads of time.

I worked extremely hard on this pack, fine-tuning every little detail and undertaking extensive tests in various situations using a variety of audio sources, to make sure these presets sound good whatever you to record use and whatever device you use for playback. I just ask that you do not share these files for free but rather point people to the promo code from the YouTube video. The products on my website are what help me keep my channel going and enable me to keep bringing you value through my videos.

Please save the files onto a safe place on your computer or hard drive. Simply right click and select 'import presets' in your video editing software. Then just drag and drop the desired preset onto your clip and that's it! Simple! Refer to the YouTube video for full, more detailed instructions and advice.

Thanks once again for being a valued customer. I'd love to know how you use your presets so feel free to send me a link to your work.

Many thanks

Sam
