AnRoMotion design
2018-2019

Thank you for your purchase. I hope you enjoy this project. For all questions, please contact hellostinson@gmail.com.

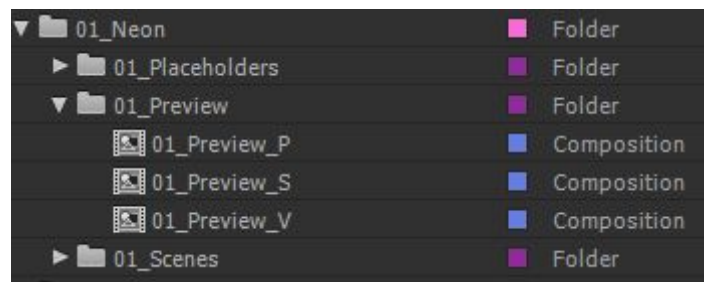

Please don't forget to rate the project.

Ready templates

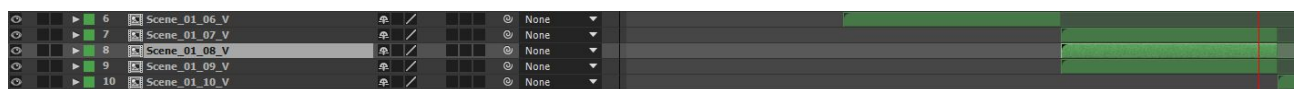

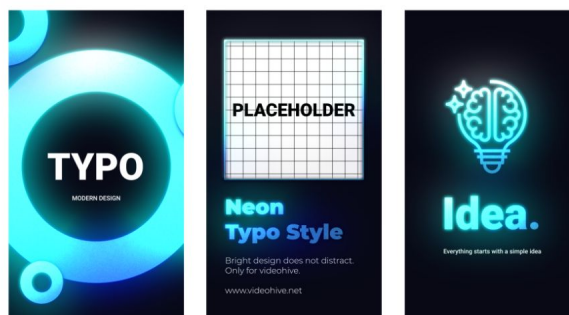

- Determine the category you need and decide which video format you need.
(01-08 categories)

- Open the "Preview_X" composition (X - Video format: **V - Vertical, S - Square, P - Portriet**)

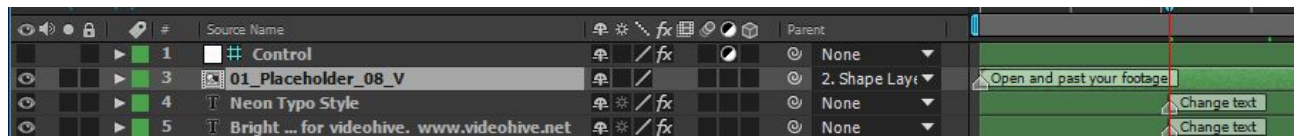

- Find the "Scene" you need and open it

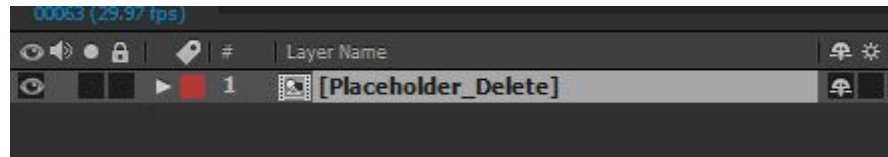

**You can open the Scenes folder and select the one you need*

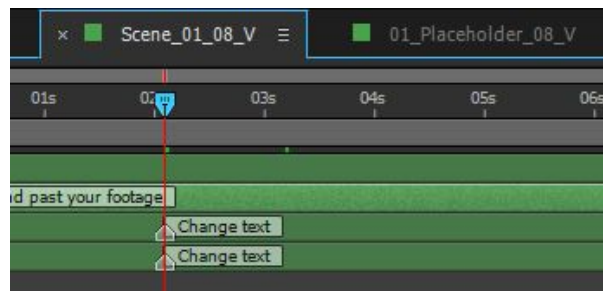

- Open Placeholder composition. *(If this composition has a placeholder)*

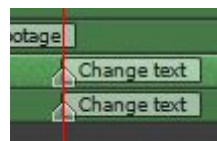

- Delete "Placeholder_Delete" layer and past your footage

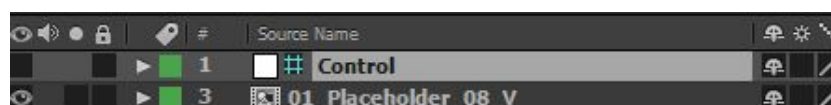

- Go back to Scene

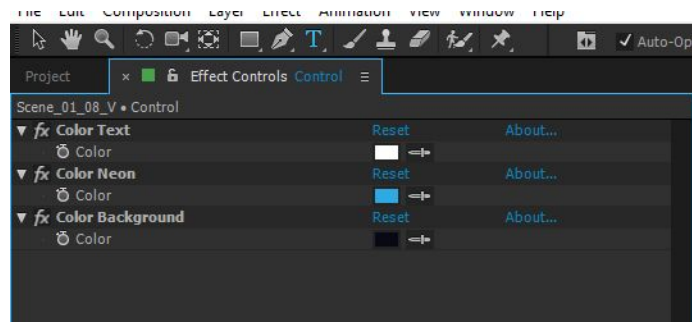

- Change text in marker place

- Select Control layer

- Open Effects Controls

- Change Colors (and other parameters if there is)
- Render!

Swipe up, Titles, Emoji

Example:

- Open 10_Titles folder
- Open 10_Preview folder
- Open 10_Title_XX folder
- Select "Control" layer
- Open Effect Controls and change colors and options
- Change text in marker place
- Open your Composition
- Past 10_Title_XX composition into your composition

Backgrounds

- Open 11_Backgrounds folder
- Open 11_Preview folder
- Open 11_Background_XX folder
- Select "Control" layer
- Open Effect Controls and change colors and options
- Open your Composition
- Past 11_Background_XX composition into your composition

Transition Constructor

- Open "Transitions" folder
- Open "Placeholder_Transition" composition
- Paste your footage or composition with ready scene
- Open "Render_Transition" composition
- Select "Control" layer and open "Effect Controls" panel
- Change Group and Option Transition
- Change In and Out checkbox
- Render
