

Adequando a exibição das fotos

Transcrição

```
import { Component, Input, OnInit } from '@angular/core'

const cloud = 'http://localhost:3000/imgs/';

@Component({
  selector: 'ap-photo',
  templateUrl: './photo.component.html'
})
export class PhotoComponent {

  @Input() description = '';
  private _url = '';

  @Input() set url(url: string) {

    if(url && url.startsWith('data')) {
      this._url = url;
    } else {
      this._url = cloud + url;
    }
  }

  get url() {
    return this._url;
  }
}
```
